

Transition from GCSE to A-level physics

Welcome to A-level physics!

At Thomas Telford UTC we study the AQA specification for A-level physics. There is no secret about the content, you are quite allowed to go to the AQA website, download a copy of the specification and teach yourself everything before September. However, thinking more realistically, there are tasks contained within this booklet to assist with the transition from GCSE to A-level physics.

These tasks will let you practice lots of different skills that you will need as you start the AS course, and are related to topics you will cover and the induction day.

I also recommend that you really take our advice about becoming a better physicist and really broaden your understanding. A-level physics does not cover everything there is to do with physics.

This booklet should be completed, and will be collected in your first AS physics lesson in the week beginning 1st September 2021.

Should you have any questions regarding the content of this booklet, or need assistance, then do not hesitate to contact me

jjackson@thomastelfordutc.com

Good luck with your results day and I look forward to you joining us in September!

Mr J Jackson
